

DADtv

Hard Disk Audio for Production Control

DADtv Benefits

- Easy to use, instant access to all audio material anywhere on your network
- Organized database of audio makes it easy to find the right cut at the right time
- Speeds the process of adding voiceovers, audio effects and audio sequencing
- Enables incorporation of discrete Surround Sound 5.1/7.1 audio into HDTV broadcasts
- Several playlist-based and 'hot-key' user interfaces included
- Automatic generation of "as played" logs greatly simplifies rights reporting tasks

DADtv Features

Every DADtv configuration is an integrated audio solution providing full multi-channel record and playback capabilities with a generous selection of random access 'hot key' based and sequential, playlist driven user interface choices. Features common to all three DADtv solutions include:

- Powerful inventory management and organization
- Multi-format record/playback capability including surround sound
- Automated audio file ingest
- Audio format/sample rate conversion
- Interfaces to many television automation systems
- Open architecture with common file system and database
- Compatible with professional and popular consumer audio file formats (WAV, PCM, MP2, MP3)
- Solid 4RU rack mount industrial chassis
- 1TB internal storage
- Gigabit network port
- Dual port RS-232/422/485 serial interface
- Eight I/O GPI
- 1 year technical support and software updates
- All audio interfaces include balanced analog and AES digital inputs and outputs

Breakout Box for DADtv HD

Breakout Box for DADtv 3D

DADtv

DADtv Package Pricing and Features

DADtv SD \$9,995

Includes all base DADtv features plus 4 stereo inputs and 4 stereo outputs, including balanced analog and AES digital interfaces (can be configured as stereo or 5.1 surround).

DADtv HD \$10,995

Includes all base DADtv features plus redundant power supplies, redundant 1TB internal storage, 1 surround input and 1 surround output (total of 8 mono inputs/8 mono outputs), including balanced analog and AES digital interfaces with breakout box (can be user configured as mix of stereo and 5.1 surround).

DADtv 3D \$12,995

Includes all base DADtv features plus redundant power supplies, redundant 1TB internal storage, 1 surround input and 3 surround outputs (total of 10 mono inputs/20 mono outputs), including balanced analog and AES digital interfaces and breakout box (can be user configured as mix of stereo and 5.1 surround).

Note: Other configurations available with custom audio and control interfaces.

DADtv Control Options

DADpad is ENCO's custom adaptation of JL Cooper's MCS-ClipShot®. Multicolored buttons w/LCD display assignable to up to 400 cuts/commands. QWERTY keyboard function facilitates library searching and command entry.

Smaller MiniDADpads communicate via USB and support 58 or 20 user mapped keys.

Adding a touch surface to the DADtv workstation or monitor increases flexibility and user customization. Available in traditional and widescreen formats.

Our WebLib package provides browser based access to DADtv audio assets via LAN/WAN. Includes software, up to 20 concurrent users and remote configuration.

Why buy from ENCO?

ENCO delivers world class audio delivery and automation tools to the most demanding broadcasters on six continents. Our powerful, cost-effective solutions range from large multinational television live broadcast applications to remote trucks to needs of small market broadcasters. We bring our customers flexible solutions that work the way they do while delivering exceptional value, performance and reliability. Since 1993, ENCO Systems has tirelessly and enthusiastically served the broadcast industry.
