

DAD Option

GATEWAY - DIST

DAD Gateway and Dist provide automatic back-up, data redundancy and parallel data availability for all DAD files including audio cuts, play lists, schedules and traffic.

DAD GATEWAY Benefits

- Automatic back up saves administrative time
- Provides prioritization of back up content
- Ensures against on-air interruptions due to network/system problems
- Enables multi-site data redundancy

Gateway/Dist Summary

Gateway is a DAD option for automatically moving files from one location on a network to another. Dist is the same application, only running on a single DAD workstation with a single destination target. Gateway is configured to provide essential data back-up and redundancy automatically for critical broadcast files and information in the DAD environment. Gateway is used to ensure audio and DAD data files are properly replicated to another location. The backup audio and data can exist on a secondary server or on a workstation with sufficient drive storage. Should a critical failure occur, all workstations on the network can access redundant backup data maintaining on-air content delivery without delay.

Key Features

- Supports network backup locations including LAN, WAN and modem connections.
- Automatic scanning of file locations and rules to initiate back up/transfer actions.
- Back up / transfer destination warnings for operational status.
- Capability to set high, medium and low priority transfer
- Rules based architecture supports specific actions for critical files, play lists, cut ranges and users.
- Miscellaneous non-DAD files supported.
- Time based deletion rules to purge obsolete data

Requirements DAD license or EZ-LIB module. Additional transporter option required for each destination.

Why buy from ENCO?

ENCO delivers world class audio delivery and automation tools to the most demanding television and radio broadcasters on six continents. Our solutions range from large multinational television live broadcast applications to the needs of the small market unattended radio station. We bring our customers flexible solutions that work the way they do while delivering exceptional value, performance and reliability.

ENCO Service and Support

ENCO's full line of support options ranging from implementation guidance and training, to 24/7 telephone support will protect and increase the return from your automation investment. Our engineers understand your business challenges and are ready to help you achieve your goals. ENCO software products are regularly updated with powerful new features and capabilities to bring ever increasing value to your operation.
