

DAD Option

WEBLIB

Macintosh Web Access to DAD Audio Library

DAD's WEBLIB option opens DAD's library on a read-only basis to any computer with a web browser. WEBLIB enables a broad range of internet or intranet applications to access DAD library audio and cut information.

DAD WEBLIB Benefits

- Flexible access to DAD data on multiple operating systems, browsers and platforms
- Enables new WEB based applications derived from DAD
- Fast, easy creation of WEB based applications with automated links to DAD

WEBLIB Summary

WEBLIB consists of server and client software plus configuration and setup services to allow user definable access to DAD audio and associated data via standard web browser tools available with most computers. WEBLIB presents a list of audio made available through DAD in Linear PCM, MP2 or MP3 formats, allowing preview without taking up a lot of bandwidth (MP3). Universal audio files may be downloaded for local use (Linear PCM). The list can also be searched by any DAD database field such as title, program name, artist or other stored attribute. User definable security levels may be established to control access or permit partial access to the DAD library.

Examples

- Provide audio library access to production workstations running on other platforms (like AVID or FinalCutPro edit suites).
- Give affiliates access to library content for use in preparing local content.
- Provide library access to off-site staff for program preparation and later upload.
- Automate archiving of select programs/content to WEB sites for on-demand access by listeners.

Requirements WEBSVR WEB server option on dedicated Windows 2000 or 2003 server with IIS and adequate client licenses; WEBCLN client options for each simultaneous connection; WEBCFG ENCO configuration and set up for WEB server. Requires Gateway/Dist with CONVERT supporting MP3.

Why buy from ENCO?

ENCO delivers world class audio delivery and automation tools to the most demanding television and radio broadcasters on six continents. Our solutions range from large multinational television live broadcast applications to the needs of the small market unattended radio station. We bring our customers flexible solutions that work the way they do while delivering exceptional value, performance and reliability.

ENCO Service and Support

ENCO's full line of support options ranging from implementation guidance and training, to 24/7 telephone support will protect and increase the return from your automation investment. Our engineers understand your business challenges and are ready to help you achieve your goals. ENCO software products are regularly updated with powerful new features and capabilities to bring ever increasing value to your operation.
