

PRESS RELEASE

ENCO Systems Announces 25th Anniversary Celebration

Southfield, Michigan, February 19, 2008: ENCO Systems Inc., a leading worldwide provider of Digital Audio Delivery Systems, announced today a 25th Anniversary Celebration to be held during the National Association of Broadcaster Convention in Las Vegas, NV this April.

ENCO Systems, Inc. was founded by two MIT engineers, Eugene Novacek and Judy Kane Novacek in 1983 in St. Louis, Missouri and is now headquartered in the greater Detroit, Michigan area. Though originally involved in custom high level fault tolerant networked industrial process control applications, business activities are now centered on the global broadcast industry. The principals of ENCO are a unique joining of professional broadcast engineers and software developers, each with years of hands-on practical experience.

Eugene Novacek, President of ENCO Systems said, "A lot of people don't realize that ENCO has been around for 25 years. We started providing industrial process control and automation to manufacturers like GM, Ford, Chrysler, Monsanto, Anheuser Busch, General Tire, Waste Management, etc. in 1983. Then, in 1991 we entered the broadcast industry and the rest is history!"

Novacek continued, "Two thirds of those stations who bought DAD that first year are still using it today, 16 years later...that's an incredible statistic and one we're humbled by. Because of the phenomenal loyalty shown by DAD users over the years we wanted to have a party for them...and us, to celebrate our mutual success."

DAD users who haven't been contacted who would like to attend the ENCO Systems 25th Anniversary Event in Las Vegas should send an email to sales@enco.com.
